

## About Us

Today, the importance of non-governmental organizations cannot be underestimated. Developed countries reached their current positions by the help of conscious civil society. TÜTEV, founded on the 10<sup>th</sup> of January, 1991 assumed the same role in our country. TÜTEV is ready to take place in any professional, social and cultural area by bringing all engineers, architects and technical staff together, getting them to aid each other and compose a common wisdom. But the main purpose is to contribute to world peace by forming a tolerant atmosphere. This contribution involves training, counselling and some projects.

It is clear that in forthcoming years changes in science and technology will continue increasingly and extraordinary innovations will happen. And TÜTEV wishes to take part in these scientific and technological performances for the sake of our society and the whole world.

Today it is harder than yesterday to provide world peace in this fascinating atmosphere of technology. Everybody should do something for world peace and use technological improvements for humanity. TÜTEV is against all inhumanistic improvements.

TÜTEV is open to all technical staff provided the conditions above are obeyed. There is surely something everybody can do or can benefit here.
