

Mission

TÜTEV was founded basically to provide social, cultural and professional solidarity among engineers from all branches, architects, chemists and people from similar professions and other technical staff. Moreover, the foundation aims to train and support technical staff, found new institutions, firms, agencies and units to meet our country's technical labor needs or help the existing ones, provided the facilities of the foundation increase. TÜTEV is by no means related with any political idea or purpose.

Depending on this;

- A) This acknowledgement rules both specify the border of activities to provide solidarity among engineers, architects, chemists and other technical staff and organize the performances the foundation will commit according to its aim.
- B) In order to train up technical staff who are devoted to our national culture and traditions, willing to research and of good character;
 - a) Getting students who desire to have a good education but cannot get the opportunity to go to boarding or day schools in the country or abroad and to have practical training,
 - b) Founding laboratories, technical offices, schools, dormitories, courses and running them as the legislation and facilities allow,
 - c) Producing, importing and exporting every kind of technical tools, equipment and devices,
 - d) Organizing seminars and conferences, getting into contact with educational institutions in foreign countries, attending conferences and seminars, sending and inviting lecturers to evaluate various educational procedures,
 - e) Arranging competitions to encourage academicals work,
 - f) Committing and motivating scientific, technical and practical performances, using and evaluating the outcomes in the units of the foundation and publishing these performances are to be done.
- C) Some economical performances will be done in order to obtain products, semi-finished products and raw materials which will be used to produce materials and services for committing activities in scientific and technical areas.
- D) Providing scholarship for needy students who go to technical schools, **collages** or university students of engineering, architecture or chemistry and building dormitories and such institutions.
- E) The foundation gets educational books accommodated and translated. It founds printing houses for this purpose. It establishes publishing houses and publishes magazines, technical

bulletin and newspaper which are sightly and sends the necessary ones to members free of charge.

- F) Founding and running recreational facilities to have technical staff and technical school students rested in summer.
- G) Making investments and taking decisions appropriate for future technological developments.
